CONTENT

- 1. Terminology and relationship between terms
 - 1.1. Open Access
 - 1.2. Open Source Software
 - 1.3. WEB 2.0
 - 1.4. The relationship
- 2. Implementation solutions on OA, OSS and WEB 2.0 at DJULG
- 3. Conclusions

1.1. OPEN ACCESS (OA)

- the access to the online information for free and by anyone interested to use it;
- international initiatives, statements and declarations that support OA: Budapest Initiative (2002), Bethesda Statement (2003), Berlin Declaration (2003), IFLA Statement (2004), Ghent Declaration (2011);
- Creative Commons licenses (CC) helps creators retain copyright while allowing others to copy, distribute, and make some uses of their work
- OA literature is the result of public-funded research;
- **the ways of publishing** OA information:
 - Golden OA publishing (Directory of Open Access Journals);
 - Green OA self-archiving (Directory of Open Access Repositories).

1.2. OPEN SOURCE SOFTWARE (OSS)

- a software, available in source code form, provided under a free software license;
- users can download, evaluate, change or improve and also distribute the software
- **General Public Licenses** (GNU or GPLv3) guarantee the freedom of sharing and changing all versions of a software;
- tools for learning and developing competencies.

1.3. WEB 2.0

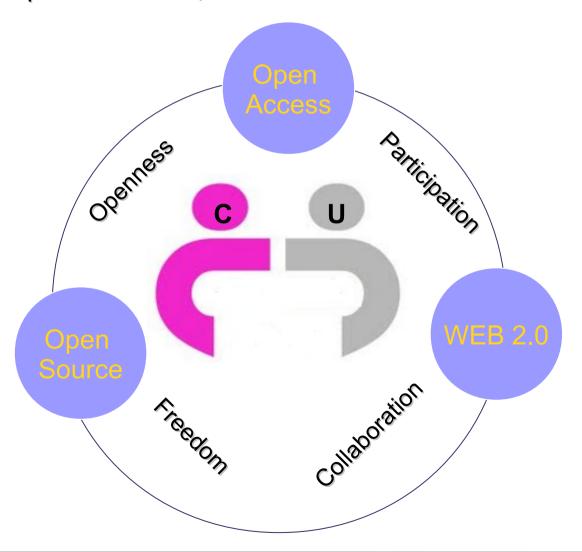

http://www.slideshare.net/hblowers/intro-to-web-20-277488/

1.3. WEB 2.0

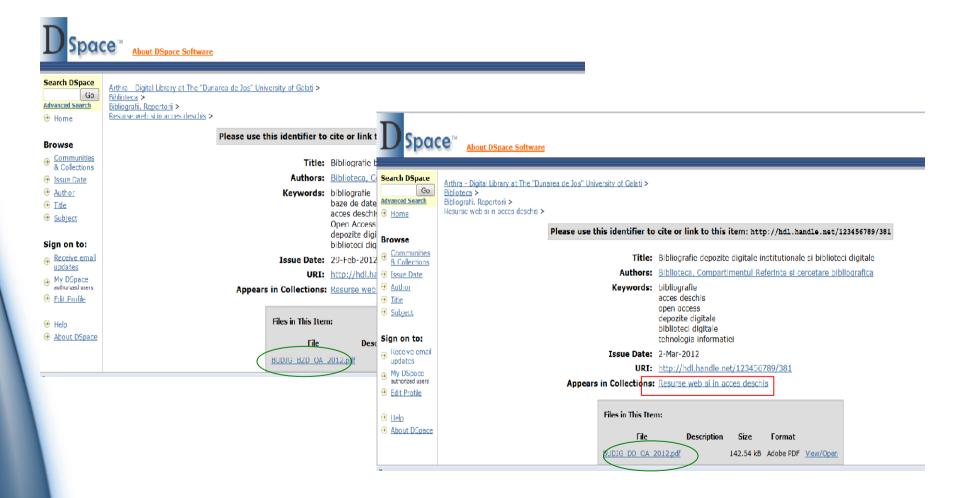

Components	WEB 1.0	WEB 2.0
Information	 is stored in databases is retrieved by keyword searching flows to users 	is created is modified is disseminated by user
User	 is guided to information is an information consumer interacts under limitations 	 the information is guided to the user is both consumer and creator active participation
Space	is supplied with data	provides data created and added

Web evolution

1.4. Relationship between OA, OSS and WEB 2.0

2.1. OPEN ACCESS

Bibliographic lists of OA databases and IR mentioned in ARTHRA repository

2.1. OPEN ACCESS

Scientific publications of "Dunarea de Jos" University of Galati indexed in DOAJ

2.2. OPEN SOURCE SOFTWARE

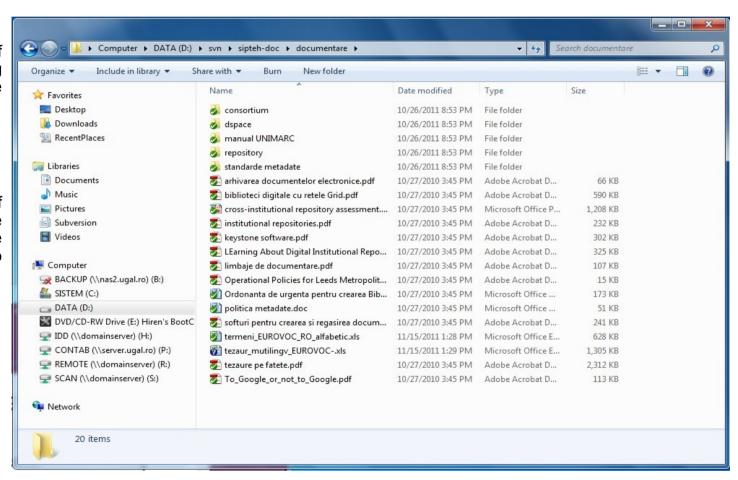

- LINUX, as operating system;
- OpenOffice, as editor of documents;
- GIMP, as graphic editor;
- TurtoiseSVN, for project documents management;
- Dspace, for digital library content;
- Connotea & Zotero, for references management.

2.2. OPEN SOURCE SOFTWARE

Checkout - the act of creating a local working copy from the repository.

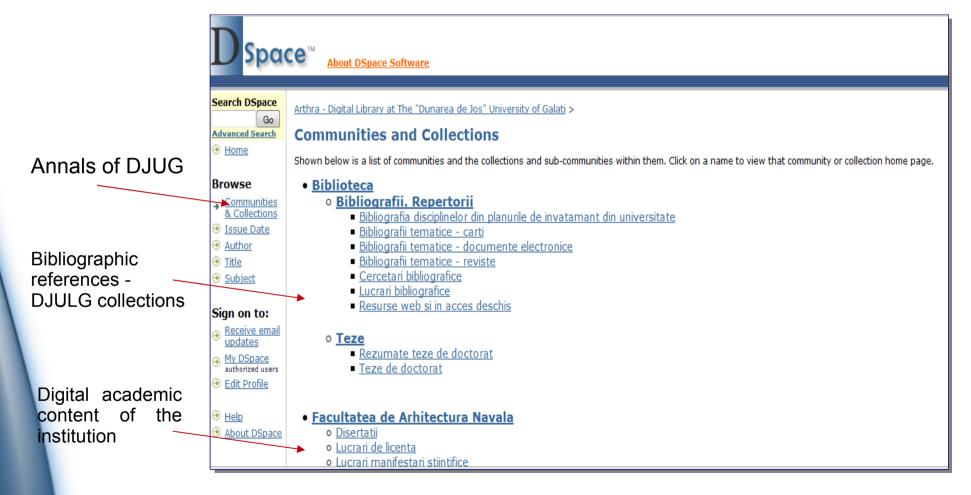

Commit - the action of writing or merging the changes made in the working copy back to the repository.

Update (or sync) - merges changes made in the repository.

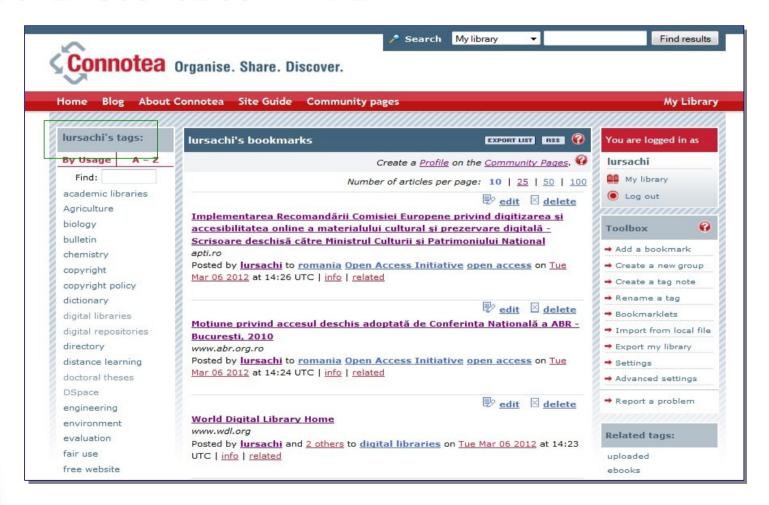

SIPTEH Project - Documents management using TurtoiseSVN

2.2. OPEN SOURCE SOFTWARE

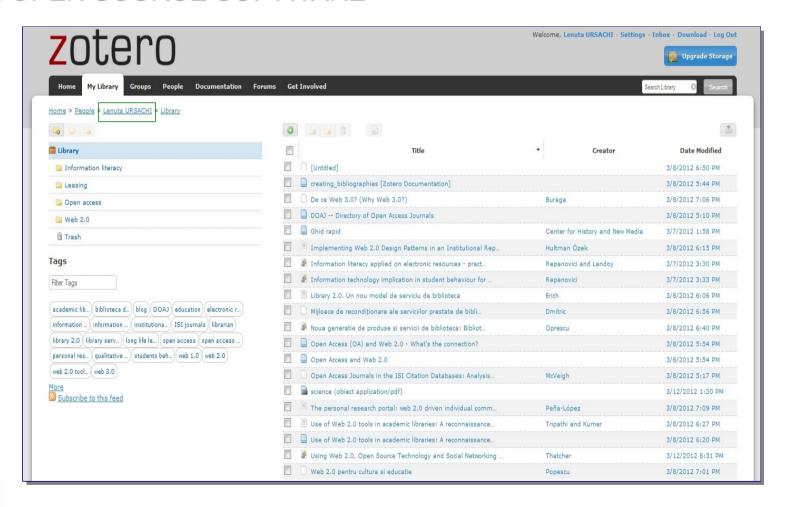

ARTHRA Digital Library using DSpace

2.2. OPEN SOURCE SOFTWARE

Reference management using Connotea

2.2. OPEN SOURCE SOFTWARE

Reference management using **Zotero**

2.2. OPEN SOURCE SOFTWARE

Features	Connotea	Zotero
Registration	X	Х
Download	-	X
Save & organize	X	X
Sharing	X	-
Item type	webpages	various
Item description	title, URL	bibliographic elements
Keywords	user	user
Export function	X	X
Search function	keywords	keywords; full text
Create bibliographies	X	Х
Other	"Add to Connotea"; centrally-hosted website	attach files; sync function; citation styles

Comparison between reference management software Connotea and Zotero

2.3. WEB 2.0 TOOLS

RSS FEEDS

INSTANT MESSAGING

SOCIAL NETWORKS

DO-IT-YOURSELF TECHNOLOGIES

2.3. WEB 2.0 TOOLS - RSS FEEDS

New entries in library collections: books, journals or electronic documents

2.3. WEB 2.0 TOOLS - SOCIAL NETWORKS

A simply way to:

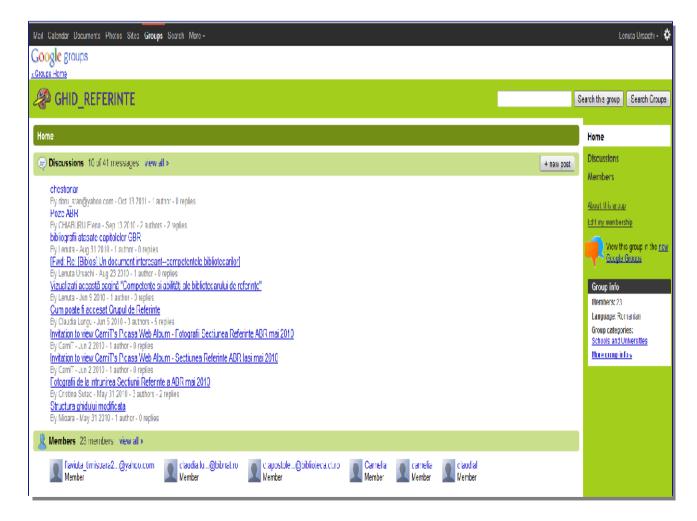

- ◆interact with the users:
- ◆ share information sources by posting useful links;
- upload news about events.

"Dunarea de Jos" University Library of Galati on Facebook

2.3. WEB 2.0 TOOLS - SOCIAL NETWORKS

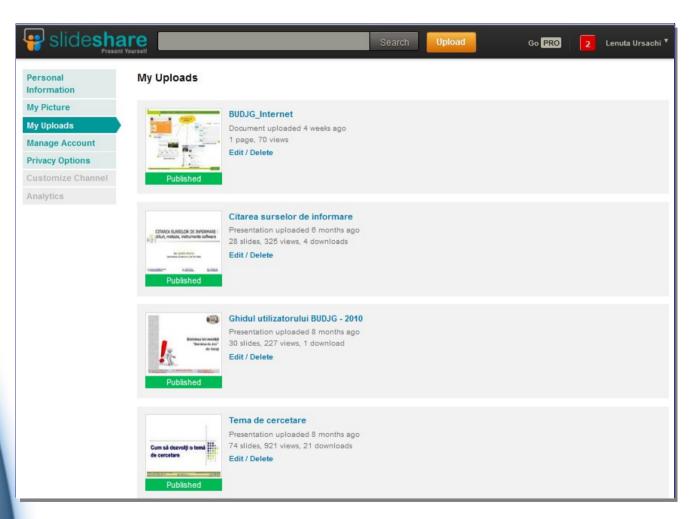

A simple solution to:

- share content;
- create web pages;
- post messages.

Reference Librarian Guide Project using Google Groups

2.3. WEB 2.0 TOOLS - SOCIAL NETWORKS

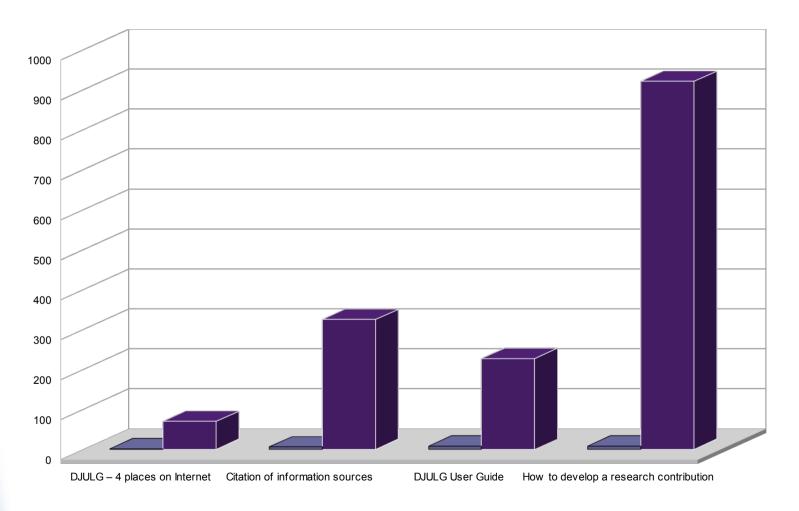

A great opportunity to:

- share content;
- increase visibility;
- statistical analysis;
- discover new information;
- interconnect with the community.

Information posted by the librarian on slideshare community

2.3. WEB 2.0 TOOLS - SOCIAL NETWORKS

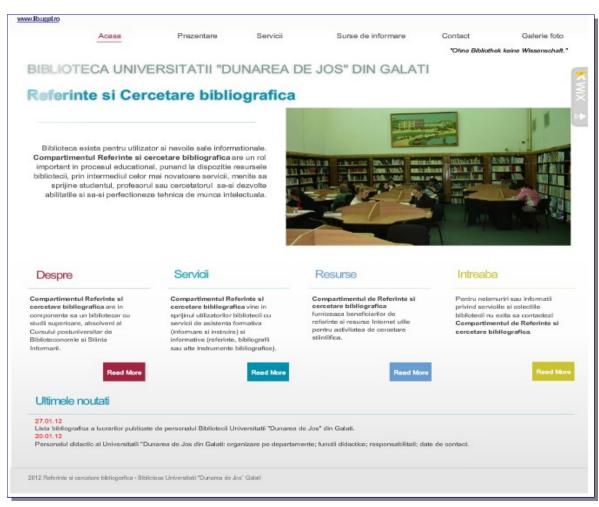

Statistics of the information tools posted on slideshare

2.3. WEB 2.0 TOOLS - DO-IT-YOURSELF TECHNOLOGIES

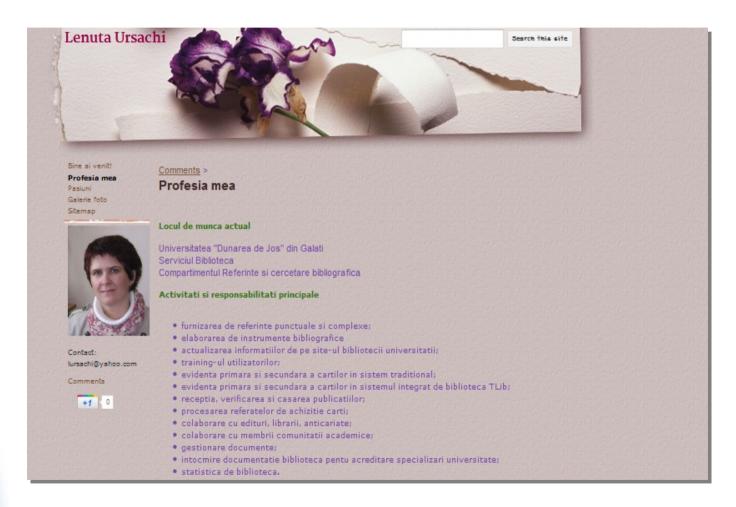

An easy way to:

- promote the services provided to the users;
- offer the most important information related to the tools created;
- mark significant events where the library has been involved.

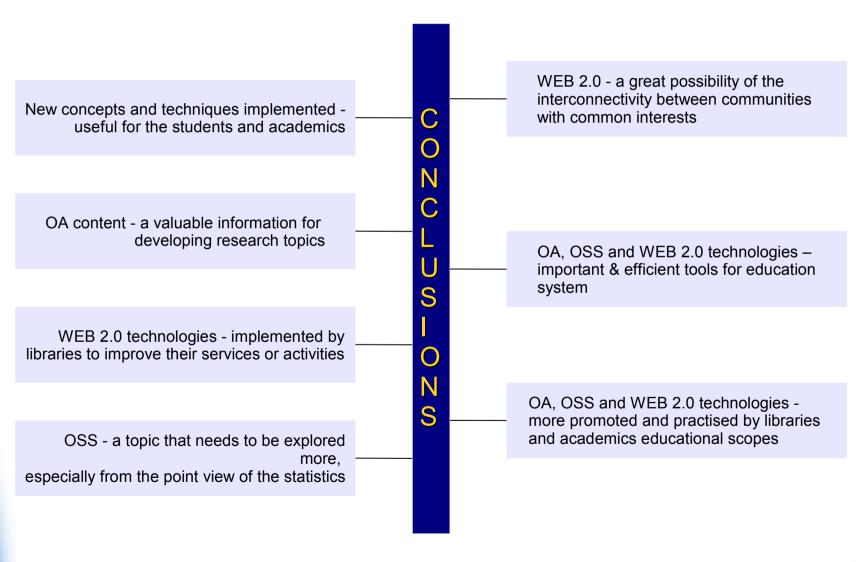

Reference Department website using www.wix.com

2.3. WEB 2.0 TOOLS – DO-IT-YOURSELF TECHNOLOGIES

Librarian's website using Google sites

3. Conclusions
